

EMBARKING ON SPRING 2024

It's time to take a look at the exciting developments that accompany us on our journey through Spring 2024.

The crypto market recently reached a historic milestone, with Bitcoin surpassing the magical \$70,000 mark. This positive momentum has not only propelled Bitcoin but also all major cryptocurrencies, with the market showing remarkable stability overall.

A significant driver for trust in cryptocurrencies is the increasing distrust in traditional financial institutions. Faced with the multifaceted challenges confronting banks and financial markets, more and more people are turning to the benefits of crypto assets. As the issuer of our token, MUN LTD, and the operator of the Mundum AG platform, we are pleased that our platform has achieved impressive returns in recent months, signaling the attractiveness of our community and project.

Another important milestone on our journey is the introduction of the new MiCA guidelines, which will come into effect in 2025 and significantly influence the regulatory landscape in Europe. These guidelines provide us with a strong legal foundation and support our efforts to create a safe and trustworthy environment for our community.

Looking back on the past months, we have already achieved great successes. Our mega-event in Cologne was a resounding success, with over 200 members of our community coming together to celebrate. With prominent guests such as Kai Ebel, Saskia Naumann, and Micaela Schäfer, as well as Beatrix Löw-Ber, the top violinist, we were able to not only provide an unforgettable event but also make a valuable contribution to charitable causes. Thanks to the generous donations from our community, we were able to raise over 10,000 CHF for UNICEF Switzerland, Good for Live, and the E.a Foundation to support disadvantaged children and their illnesses.

As a highlight of the new year, we have introduced our staking platform with various pools, including the longest pool with an impressive bonus of almost 5000% APY, starting and dynamically adjusting the number of tokens staked. These attractive staking opportunities offer you the chance to hold your tokens and earn attractive returns.

We would like to highlight one more aspect of our dynamic development: Over 95% of our investors are firmly holding onto their tokens to support our system and drive our course steeply upward. This extraordinary commitment from our community members will help us become one of the most innovative companies in our industry in the years to come. In particular, our intra-decentralized exchange is an outstanding example of innovation and security. We are proud to have created a platform that allows you to feel much safer than with most other projects.

Overall, this pioneering development of our token and community over the past 22 months is incredibly impressive. We are incredibly proud of what we have achieved so far and look forward to continuing this success story with you.

We will reach out to you again in about 14 days with the latest updates and exciting news. Until then, we wish you continued success and joy in trading and staking!

Bullish regards,

Your Mundum Team
